**To:** Frank Tomerson  
Bechtel

**From:** Nancy Winslow

**Subject:** New World Project - Tailings impoundment borings  
and monitoring wells

---

Ray Lazuk of Hydrometrics has indicated that Hydrometrics will send a map today of their proposed monitoring holes for the tailings impoundment area. He does not think that a "face-to-face" meeting is necessary, and suggested coordination of drilling plans with Bechtel be handled by Fax and telephone.

In discussing the drilling program with Dan McLaughlin, he suggested the following:

1. Coordination between Bechtel and Hydrometrics concerning the tailings impoundment borings be performed by Fax and telephone.
2. Increased communication between Bechtel, Hydrometrics and Noranda. Please either send copies of Bechtel-Noranda correspondence to Hydrometrics or send copies of Bechtel-Hydrometrics correspondence to Noranda. When correspondence regarding the proposed borings is sent to Noranda, please indicate copies go to both Dan McLaughlin and Nancy Winslow.
