LITTLE NUGGET MINE  
BEAVERHEAD COUNTY

Gold placer possibilities of the Big Hole district were known in the early seventies, but its remoteness and inaccessibility retarded their development. Sluicing for gold has been carried on in Colorado Gulch, on the Little Nugget property and on the New Discovery. Some lode mining on the Montana Oreway, produced gold, silver, lead, and copper ore; on the North Star lode, gold ore; and on the Tacoma, lead ore.
