Charity, Scope, and Organization

The Montana Bureau of Mines and Geology (MBMG) was established in 1905 to serve as a public service agency and research entity in the State of Montana. It is directed by the legislative Assembly of the State of Montana, and the Bureau is responsible for the application of the laws governing its work.

Montana's geologic past is a key to its future, providing important insights into the history of the Earth and its resources. The MBMG conducts research in the geologic sciences, including mineral resources, water resources, and hydrogeology. The bureau is responsible for the publication of reports and studies on these topics, providing valuable information to the public and other stakeholders.
